Agile Scrum Foundation

Class Length: 2 Days

Overview

EXIN Agile Scrum Foundation is a training certification that validates a professional's blended knowledge in Agile methodologies and Scrum practices.

Target Audience

The Agile way of thinking is best known in the field of software development but the principles are increasingly being applied in other types of projects. Scrum is the most used Agile methodology and is suitable for all professionals looking to keep their knowledge up to date with the latest developments in the fields of IT and Project Management, particularly those leading or participating in projects. In particular, the certification is suitable for professionals working in the areas of: Project Management; Software development; IT Service Management; and Business Management.

Course Objectives

Agile Scrum is about working together to successfully reach the goal. Agile methodologies are popular approaches in software development and are increasingly being used in other areas. Scrum practices include establishing cross-functional and self-managed teams, producing a working deliverable at the end of each iteration or Sprint.

All content of the training is in accordance with the requirements determined by the largest international certification bodies.
